I'm Innovative Computer Engineering student and Freelance System Developer with 3+ years of experience in building scalable System applications. I have Expertise in building intelligent recommendation systems, Artificial Intelligence Integrated systems and Web Apps, Skilled in **Python, React, TypeScript, Tailwind Css and also Skilled in Data Engineering with Python and Jupyter**. I'm also an Open source contributor on Github. I'm Currently Finalizing my Bsc. Degree of Science in Computer Engineering at University of Dodoma, College Of Informatics and Virtual Education (CIVE).

PROFESSIONAL EXPERIENCE

Technical Intern *July 2024 – September 2024*

Azampay Tanzania | Dar es Salaam

- Participated in agile development cycles and code review sessions.
- Conducted system troubleshooting and prepared technical documentation.

Freelance Full-Stack Developer *2023 – Present*

Self-employed | Remote

- Developed custom web applications for local SMEs and Organizations.
- Optimized business workflows through automated reporting dashboards.
- Deployed and maintained production applications for clients.
- Provided ongoing technical support and system monitoring.

TECHNICAL SKILLS

GenAI & LLMs: Fine-tuning (LoRA/QLoRA), RAG systems, ChromaDB, Hugging Face, Models API.

Python & Data: FastAPI, Pandas, NumPy, PyTorch, Scikit-learn, OpenCV, TensorFlow, Librosa.

Data Engineering: PostgreSQL, MySQL, SQLite, Data Cleaning, ETL Pipelines, API Integration.

Cloud & DevOps: Docker, Git, Linux, Render, Netlify, Vercel, GitHub Actions, Supabase.

Frontend: React, Vue, Vite, Tailwind CSS, JavaScript, TypeScript, SCSS, Three.js

IoT & Hardware: Arduino, Sensor Integration, Real-time Data Processing

EDUCATION

University of Dodoma *2022 – Present*

- BSc in Computer Engineering, Specializing in Software Development & Artificial Intelligence.

College of ICT (COICT) *2020 – 2022*

- Diploma in Computer Science, University of Dar es Salaam

MY LEARNING FRAMEWORK

- ✓ **Machine Learning & AI:** Self-taught and Practise on tons of Tutorials, following Karpathy, Ilya Sutskever, Hinton, LeCun, Bengio, Radford, Georgi Gerganov.
- ✓ **Full-Stack Development:** Self-taught with production deployments across multiple projects.
- ✓ **API Development & Integration:** Self-taught; production experience at Azampay and Other places.

CURRENTLY OPEN TO

- 📁 Freelance contracts in AI/ML, Data Engineering, or System Development.

- 👥 Collaboration on open-source projects, especially for East African context.
- 💻 Remote internships or full-time roles, willing to commit fully.
- 📺 Investors interested in funding.

FEATURED PROJECTS

Malaika: AI Companion with RAG & Vision

- Fine-tuned Mistral-7B and Qwen2.5-VL-7B-Instruct via Hugging Face.
- Implemented Chroma vector database for long-term memory retrieval
- Integrated Moondream2 for real-time visual awareness through camera.

Kioni: Culturally Intelligent AI

- AI that understands East African cultural context (Swahili/English/Sheng) with voice + vision.

Mambo: Social Networking App

- A web app to connect, swipe, match, chat.
- Real-time matching algorithm with personality-based recommendations.

IoT AI Fertilizer Recommendation

- Real-time soil sensor data to an AI fertilizer recommendations for maize farmers in Dodoma.

Kaziboksi: Unified Job Platform for Tanzania

- AI job matching, CV parsing, skill gap analysis, CV maker, AI hiring.

Sekela POS: Cloud POS with AI Analytics

- Cloud-native POS with AI business analytics for East African MSMEs.

AfyChecker: Health Assistant

- Multilingual symptom checker (Swahili/English) with Groq API integration.

Aurafy: Music Personality Analyzer

- Analyzes Spotify listening habits to generate personality profiles
- OAuth 2.0 authentication with Spotify API

University Finder Platform

- Sekelafindr.

Chuodeep: Student AI Chat Assistant

- AI chat tool for academic information retrieval (UDOM students)

CiveGpt: Chatbot for CIVE/Informatics

Contact:

🔗 github.com/zuck30

🌐 sheddysilicon.netlify.app

✉ mwalyangashadrack@gmail.com

☎ +255 774 174 921

- Specialized chatbot for CIVE and Informatics students at UDOM

NNStudio: 3D Neural Network Visualization

- Watch a neural network train in real-time 3D.

Jenga3D: Theory of Computation Visualizer

- DFA, NFA, -NFA visualized in 3D because flat diagrams are boring.

Sura: Branded Social Media Image Cards

- Create branded image cards for social media instantly

- [Live Demo: surabox.netlify.app](https://surabox.netlify.app)

Garidesk: Garage Management System

- Car and garage management with AI business analytics (client build)

Cash Transaction Risk Classifier

- Random Forest Classifier for Low/Medium/High risk cash transactions.

Swahili Music Mood Classifier

- ML classification for Swahili music by mood (happy, sad, energetic, relaxed).
